Chapter 4 Network Design & Analysis

Network Design & Analysis In the introductory chapter, we made the claim (in Sec 13) that circuit switching was here to stay in the core, as it can make the Internet more efficient, if packet and circuit networks work together Accordingly, we proposed packet -and-circuit network convergence (pacc network);

Data Networks Lecture 1 Introduction

Network services • Synchronous - Session appears as a continuous stream of traffic (eg, voice) - Usually requires fixed and limited delays • Asynchronous - Session appears as a sequence of messages - Typically bursty - Eg, Interactive sessions, file transfers, email • Connection oriented services - Long sustained session - Orderly and timely delivery of packets
